### **DETAILED ACTION**

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on March 2, 2009 has been entered.

#### ***Response to Arguments***

2. Applicant's arguments, see pages 7-14, filed on March 2, 2009, with respect to claims 1-6, 8-23, 49-55 and 58-59 have been fully considered and are persuasive. The 35 U.S.C. 103(a) rejection(s) of claims 1-6, 8-23 and 49-55 have been withdrawn.

#### ***Allowable Subject Matter***

3. Claims 1-6, 8-23, 49-55 and 58-59 are allowed.

#### ***Reasons for Allowance***

4. The following is an examiner's statement of reasons for allowance.

The prior art of record teach the construction and use of wind turbines having blades which are, in some cases, connected to an outer ring to provide additional strength to the blades. Wind turbines of any kind and the proper size are easily mounted in elevated surfaces (towers, poles, mountains, buildings, etc.) to improve their exposure to stronger winds. Adding any one of a plurality of wind diffusers, channels, flaps or any other wind-modifying devices to any part, movable or fixed, of the turbine structure to provide a certain amount of wind control is also known in the art. However, the construction of a wind turbine having a blade tip connected airfoil ring diffuser

specifically designed to operate in the particular wind-flow conditions found above the roof of a building as disclosed in this application is known in the art.

The prior art of record, taken alone or in combination, does not teaches the construction of a rotor for a roof-mounted wind turbine as described on and including all the disclosed limitations of independent claims 1 and 58, comprising:

a plurality of radial blades and a ring-shaped aerofoil diffuser connected to the outer tips of the blades and configured to inhibit the partly axial and partly radial airflow from the blades.

Dependent claims 2-6, 8-23, 49-55 and 59 are considered allowable by their respective dependence on allowed independent claims 1 and 58.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

#### ***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See TPO-892.
